KiwiShare

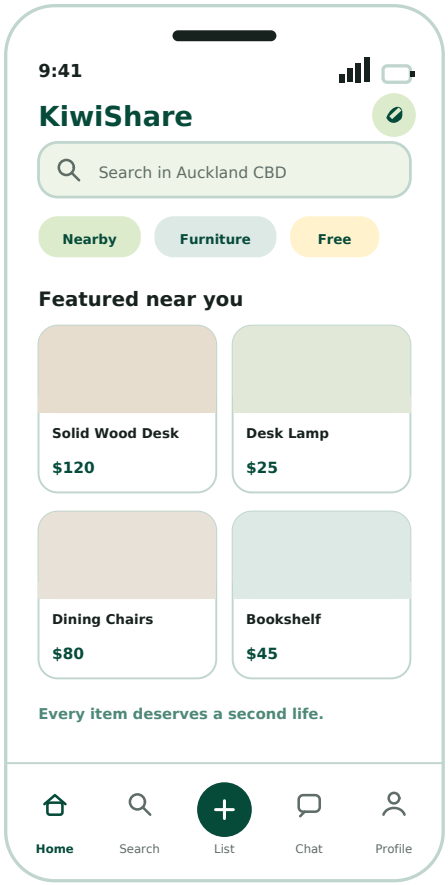

UI DESIGN GUIDELINES

Visual edition | Version 1.1

A consistent, accessible and recognisably KiwiShare
design system for our Flutter marketplace.

TRUSTWORTHY | LOCAL | SUSTAINABLE

Simple by default. Human in every detail.

FIVE GUYS | COMPSCI 734 | 12 AUGUST 2026

What KiwiShare should feel like

The interface earns trust before it asks for action.

Trustworthy

Identity, location, payment and trade status are always clear.

Local

Friendly language and community-focused journeys for Aotearoa.

Sustainable

Calm natural colours and second-life messaging without guilt.

Simple

One primary task and one visually dominant action per screen.

FIVE DESIGN PRINCIPLES

- **Trust before decoration**
- **Simple by default**
- **Consistent across the journey**
- **Accessible to everyone**
- **Local and human**

PRODUCT VOICE

Clear, friendly NZ English

- Use direct labels: List an item, Message seller, Reserve item, Confirm trade.
- Explain why permissions are needed and make every error message actionable.

A calm palette with confident contrast

Core colours

brandPrimary
`#064B3A`
Primary actions and active navigation

brandSecondary
`#4E8878`
Secondary graphics and icons

brandAccent
`#D99713`
Highlights and progress only

primaryContainer
`#DCEBCB`
Selected cards and calm panels

Surfaces and semantic states

background
`#FBFAF6`
Default app canvas

surfaceMuted
`#EFF4E9`
Grouped sections

success
`#2E7D32`
Completed or verified

warning
`#6B4A00`
Pending or caution

error
`#B3261E`
Failure or destructive

info
`#3F6FD9`
Neutral system notice

Contrast examples

GOOD 10.12:1 AAA

White text on brandPrimary

AVOID 2.40:1

Gold is not body text

Rule: status always needs an icon or label as well as colour.

Readable hierarchy for every screen

FONT FAMILY

Inter

for Flutter UI

Fallback: platform system font. Keep Arial for presentation material only.

Display Large 32 / 40	**Give every item a second life.**
Headline Large 24 / 32	**Featured near you**
Headline Medium 20 / 28	**Complete your trade**
Title Medium 16 / 24	**Solid Wood Desk**
Body Large 16 / 24	Meet safely at a verified public location.
Body Medium 14 / 20	Auckland CBD | Listed 2 hours ago
Label Large 14 / 20	**Reserve item**
Label Small 12 / 16	Seller verified

TYPE RULES

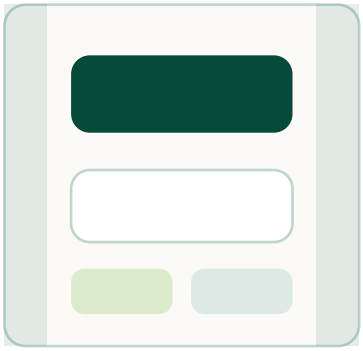

Sentence case | 14 px minimum body text | Support 200% scaling | Max 3 levels per screen

Built on an 8-point rhythm

Spacing tokens

space1	4 px
space2	8 px
space3	12 px
space4	16 px
space6	24 px
space8	32 px
space12	

MOBILE GRID

16 px screen padding

Corner radius

small	medium	large	full
8 px	12 px	16 px	999 px

Elevation and alignment

Use quiet depth

Prefer borders and surface changes. Elevation 1 for cards; 2-3 only for temporary overlays.

Share one left edge

Use 16 px horizontal padding and 24 px between major sections. Avoid one-off offsets.

Minimum interactive target: 48 x 48 px

Buttons, inputs and interaction states

Buttons

List an item

Primary

Message seller

Secondary

Reserve item

Disabled

INPUT - DEFAULT

Search in Auckland CBD

INPUT - FOCUSED

Wooden desk

INPUT - ERROR

Price

Enter a price greater than $0.

Keep labels visible.

Do not rely on placeholder text.

Required states

Action

Default

Action

Pressed

Action

Focused

Loading

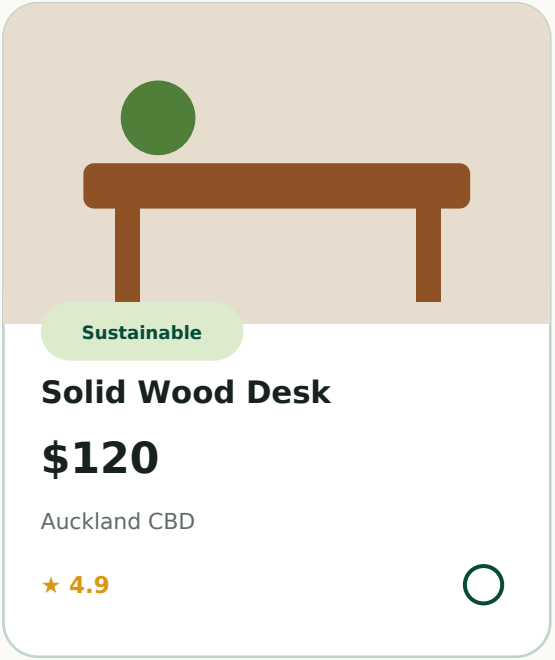

Action

Disabled

COMPONENT RULES

- Use one primary action per screen or section whenever possible.
- Primary and secondary buttons share the same 48 px height and 12 px radius.
- Confirm destructive actions such as delete listing, block user or cancel trade.

Product cards, chips and browse views

CARD ANATOMY

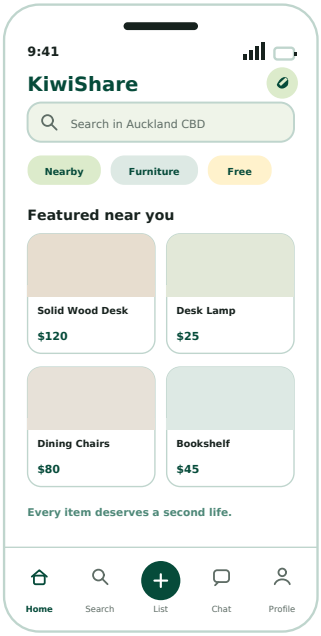

1. 4:3 listing image
2. Title + price hierarchy
3. Approximate location only
4. Trust cue + favourite action

Never expose a private street address in browse views.

Chips and badges

Furniture | Selected | Verified | Pending

CONSISTENCY IN CONTEXT

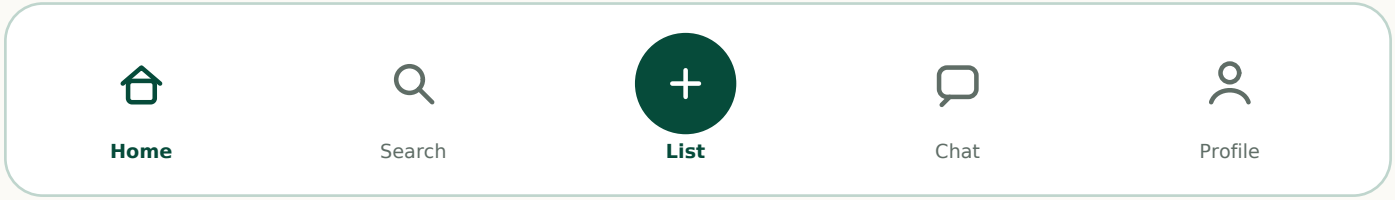

Browse screen checklist

- ✓ Consistent grid height
- ✓ One-line title truncation
- ✓ Visible price and location
- ✓ Verification cue is understandable
- ✓ Favourite action has 48 px target

Stable navigation. Obvious outcomes.

Top-level navigation

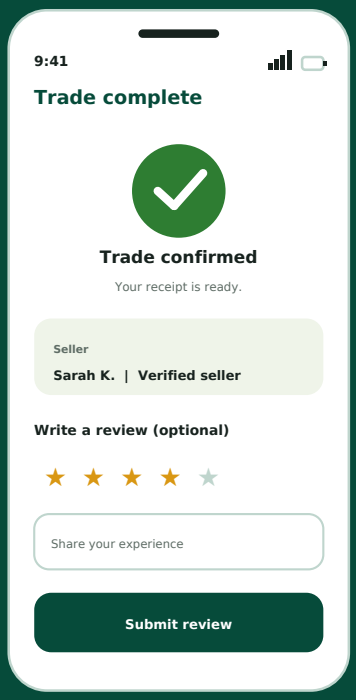

Semantic feedback

Completed
Trade confirmed

Pending
Waiting for seller

Failed
Payment unsuccessful

Info
Meet at a Safe Zone

TRANSACTION FEEDBACK

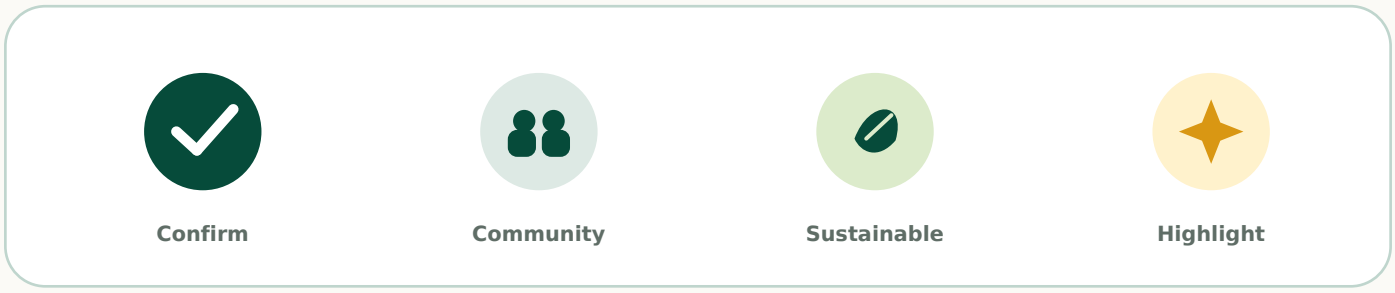

State what happened.

Then show the next useful action.

- Feedback after save, reserve, send, scan, pay and confirm.
- Show progress for operations longer than one second.
- Preserve user content after a recoverable error.
- Offer alternatives to map-only or QR-only interactions.

One visual language, used with care

Icon family

Use Material Symbols Rounded at 24 px; use 20 px only in compact controls.

Image roles

LISTING PHOTOS

Real user photography

Product evidence must not be generated or misleading.

ILLUSTRATION

Brand storytelling

Use for onboarding, empty states and education.

SYSTEM ICONS

Functional meaning

Pair unfamiliar or high-risk icons with a text label.

Logo use

CLEAR SPACE

Leave at least the height of the kiwi head/eye detail around it.

Do not stretch, recolour or change its proportions.

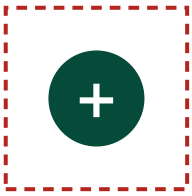

Designed to work for more people

WCAG 2.2 AA BASELINE

4.5:1 normal text

3:1 large text and UI graphics

Touch target

48 x 48 px

Minimum interactive area

The icon may be smaller.

TEXT SCALING

200% must not clip

Wrap content and keep actions reachable.

Mapp[illegible] checklist

- **Screen-reader labels and logical reading order**
- **Visible keyboard focus where applicable**
- **Meaning is never communicated by colour alone**
- **Reduced-motion setting is respected**
- **Maps and QR flows have accessible alternatives**
- **Errors explain both the problem and next action**

Test with real devices, large text, low vision settings and imperfect connectivity.

Tokens first. One source of truth.

Feature code must use shared tokens instead of one-off colours and TextStyle definitions.

```
abstract final class AppColors {
  static const brandPrimary = Color(0xFF064B3A);
  static const brandSecondary = Color(0xFF4E8878);
  static const brandAccent = Color(0xFFD99713);
  static const background = Color(0xFFFBFAF6);
  static const surface = Color(0xFFFFFFFF);
  static const textPrimary = Color(0xFF17221E);
  static const border = Color(0xFFBFD5CD);
}

abstract final class AppSpacing {
  static const xs = 4.0;
  static const sm = 8.0;
  static const md = 12.0;
  static const lg = 16.0;
  static const xl = 24.0;
  static const xxl = 32.0;
}
```

UI pull request checklist

- [ ] Shared colour and typography tokens are used.
- [ ] Spacing follows the 8-point system.
- [ ] All component states are implemented.
- [ ] Touch targets are at least 48 x 48 px.
- [ ] Text scaling and overflow are tested.
- [ ] Contrast and semantic labels are verified.

Review together. Approve once. Reuse everywhere.
